

MESSAGE FROM THE CHAIRMAN OF THE BOARD

The Board of Directors and I are very pleased to share the second edition of our Sustainability Report. In it, you'll see a fulsome report highlighting our 2015 performance across the environmental, social and governance areas that are important to our stakeholders and our company. You'll see metrics which measure our performance reported over a multi-year period so that progress can be measured.

Although 2015 was a difficult year for commodities, ensuring the safety of our people, the communities where the company operates, and operating responsibly remained a top priority for the Board and the company. In 2015, we continued to see positive growth in our safety culture which is reflected in our strong safety performance metrics. We also made significant strides toward improving operational performance while maintaining strict financial discipline and reducing spending.

On behalf of the Board of Directors and myself, we are committed to continually improve our sustainability performance. It's important to Enerplus, our stakeholders and our business. In short, we care.

Elliott Pew
Chairman of the Board
